

2021/2022:

1. A case series of adult patients affected by EAST/SeSAME syndrome suggests more severe disease in subjects bearing KCNJ10 truncating mutations Suzumoto, Y., Columbano, V., Gervasi, L., Giunta R, Mattina T, Trimarchi G, Capolongo G, Simeoni M, Perna AF, Zacchia M, Toriello G, Pollastro R, Rapisarda F, Capasso, G., Trepiccione, F. *Intractable and Rare Diseases Research*, 2021, 10(2), pp. 95–101.
2. Lanthionine, a novel uremic toxin, in the vascular calcification of chronic kidney disease: The role of proinflammatory cytokines Perna, A.F., Russo, L., D'esposito, V., Formisano P, Bruzzese D, Vigorito C, Coppola A, Lombari P, Russo, D., Ingrosso, D. *International Journal of Molecular Sciences*, 2021, 22(13), 6875.
3. Pure Gitelman-like syndrome secondary to SLC26A4 (pendrin) mutation Trepiccione, F., Suzumoto, Y., Perna, A., Capasso, G. *Kidney International*, 2021, 100(4), pp. 947–948.
4. Homocysteine solution-induced response in aerosol jet printed oects by means of gold and platinum gate electrodes D'Angelo, P., Barra, M., Lombari, P., Coppola A, Vurro D, Tarabella G, Marasso SL, Borriello M, Chianese F, Perna AF, Cassinese, A., Ingrosso, D. *International Journal of Molecular Sciences*, 2021, 22(21), 11507.
5. Nephroplex: a kidney-focused NGS panel highlights the challenges of PKD1 sequencing and identifies a founder BBS4 mutation. Zacchia, M., Blanco, F.D.V., Trepiccione, F., Blasio G, Torella A, Melluso A, Capolongo G, Pollastro RM, Piluso G, Di Iorio V, Simonelli F, Viggiano D, Perna AF, Nigro, V., Capasso, G. *Journal of Nephrology*, 2021, 34(6), pp. 1855–1874.
6. Uremic Toxin Lanthionine Induces Endothelial Cell Mineralization In Vitro Coppola, A., Vigorito, C., Lombari, P., Martizes Ingrosso, D., Perna, A.F. *Biomedicines*, 2022, 10(2), 444.
7. BK Virus Infection and BK-Virus-Associated Nephropathy in Renal Transplant Recipients Borriello, M., Ingrosso, D., Perna, A.F., Lombardi A, Maggi P, Altucci, L., Caraglia, M. *Genes*, 2022, 13(7), 1290.
8. Multi-Omics Studies Unveil Extraciliary Functions of BBS10 and Show Metabolic Aberrations Underlying Renal Disease in Bardet–Biedl Syndrome Marchese, E., Caterino, M., Fedele, R., Pirozzi F, Cevenini A, Gupta N, Ingrosso D, Perna A, Capasso G, Ruoppolo, M., Zacchia, M. *International Journal of Molecular Sciences*, 2022, 23(16), 9420.
9. Dapagliflozin Prevents Kidney Glycogen Accumulation and Improves Renal Proximal Tubule Cell Functions in a Mouse Model of Glycogen Storage Disease Type 1b D'Acierno, M., Resaz, R., Iervolino, A., Nielsen R, Sardella D, Siccardi S, Costanzo V, D'Apolito, Suzumoto Y, Segalerba D, Astigiano S, Perna AF, Capasso G, Eva, A., Trepiccione, F. *Journal of the American Society of Nephrology*, 2022, 33(10), pp. 1864–1875.
10. Metabolomic fingerprinting of renal disease progression in Bardet-Biedl syndrome reveals mitochondrial dysfunction in kidney tubular cells Marchese, E., Caterino, M., Viggiano, D., .Cevenini A, Tolone S, Docimo L, Di Iorio V, Del Vecchio B, Fedele R, Simonelli F, Perna AF, Nigro V, Capasso G, Ruoppolo, M., Zacchia, M. *iScience*, 2022, 25(11), 105230.
11. Methods for calculating the number of nephrons from ultrasound scans and kidney biopsies for nephrologists' use. Borriello, G., Gravina, I., Perna, A.F., Viggiano, D., Pollastro, R.M. *Giornale italiano di nefrologia : organo ufficiale della Società Italiana di Nefrologia*, 2022, 39(6).
